Acid Resistance Material Application Work

Jainco Refractories undertakes acid-proof brick and tile lining on a turnkey basis, delivering complete anti-corrosive solutions backed by our own manufacturing units. Our experienced lining teams, supervised by field experts, ensure quality workmanship, timely delivery, and cost-effective execution on every project.

Typical Stages of Acid Proof Lining:

1. Application of Bitumen Primer
2. Application of Bitumen Mastic
3. Application of Acid Proof Mortar
4. Laying of Acid Proof Bricks / Tiles
5. Pointing / Jointing
